OBJECTIVE

Seeking a QA Engineer / Software Tester position to utilize my skills in manual and automation testing that offers professional and organizational growth, while being resourceful and detail-oriented in delivering reliable, high-quality software.

EXECUTIVE SUMMARY

Manual Testing Skill

- 6+ months of hands-on experience in software testing, including Salesforce CRM and web applications.
- Skilled in test scenario and test case preparation, test case review, and test case execution based on business requirements.
- Performed Black Box, Functional, Non-Functional, Smoke, Sanity, Regression, Re-Testing & Validation, and End-to-End Testing.
- Experience in defect identification, defect reporting, bug tracking, and retesting/verifying bug fixes.
- Strong knowledge of Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC), and Bug Life Cycle.
- Experience working in Agile Scrum environments, collaborating with developers and cross-functional teams.
- Good experience in CRM (Salesforce) application testing, business process validation, UI Testing, and Cross-Browser Testing.
- Validated data, validation rules, and approval processes; tested Salesforce Flows and data synchronization.
- Used Microsoft Excel, GitHub, and JIRA for test documentation, version control, and bug tracking.

Automation Testing Skill

- Working knowledge of Java for automation testing fundamentals.
- Exposure to Selenium for automation testing of web-based applications.
- Hands-on practice with Eclipse IDE for developing and running automation test scripts.

EMPLOYMENT HISTORY

Designation: QA Intern

Organization: NSIQ Infotech Pvt Ltd

Duration: Feb-2026 to Till Date

SKILL PROFILE

Testing Process	Manual & Automation Testing
Programming Language	Java
Automation Tool	Selenium
Test Management Tool	JIRA
Tools	Microsoft Excel, Eclipse, GitHub

PROFESSIONAL EXPERIENCE

Total Experience: 6+ Months

Current Project

Project: QuoteForce

Client: NSIQ Infotech Pvt Ltd **Domain:** Salesforce CRM / Sales Quotation Management

Description: Salesforce-based application for creating, managing, and sending customer quotations, featuring pricing validation, approval workflows, and PDF generation.

Roles & Responsibilities:

- Prepared test scenarios and test cases based on business requirements.
- Performed Functional, Smoke, Sanity, Regression, and End-to-End Testing.

- Validated quote creation, pricing, discounts, taxes, approvals, and PDF generation.
- Tested Salesforce Flows and business processes.
- Identified, reported, retested, and verified defects.
- Collaborated with developers to validate fixes during Agile sprints.

Previous Projects

Project 1: CRM Sales Automation System

Client: Microset Instrumentation & Controls **Domain:** Salesforce CRM / Sales Automation

Description: *Salesforce CRM application managing Leads, Opportunities, Products, Quotes, and Orders to automate the complete sales process, including GST calculations and approvals.*

Roles & Responsibilities:

- Tested Lead, Opportunity, Product, Quote, and Order management.
- Validated pricing, GST calculations, approval process, and quote generation.
- Tested Salesforce Flows and validation rules.
- Performed Functional, Smoke, Sanity, Regression, and End-to-End Testing.
- Reported defects, performed re-testing, and verified bug fixes.
- Worked with developers and business analysts in an Agile environment.

Project 2: ConvoForce

Client: NSIQ Infotech Pvt Ltd

Description: *ConvoForce integrates Salesforce with WhatsApp, enabling users to send and receive messages, create leads automatically, and manage customer conversations.*

Roles & Responsibilities:

- Created and executed test scenarios and test cases.
- Tested WhatsApp messaging, templates, and conversation history.
- Verified automatic Lead creation and Salesforce data synchronization.
- Performed Functional, Smoke, Sanity, Regression, and UI Testing.
- Logged defects, performed re-testing, and validated bug fixes.
- Participated in Agile testing activities.

Project 3: NSIQ Infotech Corporate Website (Live Website)

Client: NSIQ Infotech Pvt Ltd **Domain:** Corporate Website / Web Application Testing

Description: *Manual testing of the live NSIQ Infotech corporate website to validate functionality, UI, responsiveness, and cross-browser compatibility.*

Roles & Responsibilities:

- Created and executed test cases.
- Performed Functional, Smoke, Sanity, Regression, and UI Testing.
- Validated website pages, forms, navigation, and links.
- Tested responsiveness across different devices and browsers.
- Logged, tracked, and retested defects.
- Supported release validation and collaborated with developers to verify bug fixes.

EDUCATIONAL QUALIFICATION

- Bachelor of Computer Applications (BCA) — Kavayitri Bahinabai Chaudhari North Maharashtra University, Jalgaon (Jun 2019 – May 2022), CGPA: 9.1

CERTIFICATIONS

- Java Full Stack Developer — The Kiran Academy, Pune
- Manual Software Testing + Agile — Udemy

DECLARATION

I hereby confirm that the facts stated in this application are true to the best of my knowledge.
